SECTION III: RISK FACTORS

RISK FACTORS

*Any investment in equity securities involves a high degree of risk. Investor should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. To obtain a more complete understanding, you should read this section together with Sections titled, **Our Business**, and **Management’s Discussion and Analysis of Financial Condition and Results of Operations** beginning on page no. 107 and 200 respectively, as well as the other financial and statistical information contained in this Draft Prospectus.*

Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this Draft Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian AS, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. *Some risks may not be material individually but may be material when considered collectively.*
2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTORS

A. Business Related Risks

1. *Our top ten clients contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top ten customers have contributed 95.16%, 98.60% and 99.90% of our revenues for the year ended March 31, 2023, March 31, 2022 and March 31, 2021 respectively based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers which are majorly from Foodtech and Autotech industries, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long-term relationships with our clients, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

2. *Our inability to effectively manage our rapid growth could have a material adverse effect on our operations, results of operations and financial condition.*

Since we were founded in the year 2007, we have experienced rapid growth and significantly expanded our operations. We intend to continue expansion in the foreseeable future to pursue existing and potential market opportunities. This rapid growth places significant demands on our management and operational resources. In order to manage growth effectively, we must implement and improve operational systems, procedures and internal controls, technology on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to service our clients' needs, hire and retain new employees, pursue new business or operate our business effectively. Failure to effectively transfer new client business to our service delivery centres, properly budget transfer costs or accurately estimate operational costs associated with new contracts could result in delays in executing client contracts, trigger service level penalties, give the client the right to terminate the contract for breach, or cause our profit margins not to meet our expectations or our historical profit margins. Our inability to execute our growth strategy, to ensure the continued adequacy of our current systems or to manage our expansion effectively could have a material adverse effect on our business, results of operations, financial condition and cash flows.

3. *Our business is highly dependent on technology and any disruption or failure of our technology systems may affect our operations.*

We believe that our technological capabilities play a key role in helping us effectively manage our operations, maintain operational and fiscal controls, and support our efforts to enhance client service levels. Our business is significantly dependent on the efficient and uninterrupted operation of our technology infrastructure and systems to provide our support services and back-office processing. For further details of our business, see "***Our Business***" on page 107 of this Draft Prospectus.

We expect our clients to continue to demand more sophisticated and customized solutions. We may lose clients and our business could be affected if we fail to implement and maintain our technology systems or fail to upgrade or replace our technology systems to handle increased volumes, meet the demands of our clients and protect against disruptions of our operations. Our operating efficiency may decline and our growth may suffer if our technology systems are unable to handle additional volume of our operations as we grow. Some of our existing technologies and processes in the business may become obsolete or perform less efficiently compared to newer and better technologies and processes in the future. Certain of our competitors may have access to similar or superior technology or may have better adapted themselves to technological changes. The service industry could also experience unexpected disruptions from technology-based start-ups. The cost of upgrading or implementing new technologies, upgrading our systems or expanding their capacity could be significant and could affect our business, operations, financial condition and results of operations.

4. ***The business of our company is exposed to operational disruptions which can disrupt the normal functioning of our company's operations. These disruptions can be caused by various factors such as system failures, cyberattacks, or internal inefficiencies.***

Our Company is engaged in the business of Business Process Outsourcing (BPO) services. We rely heavily on technology, human resources, and intricate processes to deliver our services. However, this reliance also exposes us to operational disruptions that can arise from various sources such as system failures, cyberattacks, or internal inefficiencies. These disruptions can lead to service interruptions, client dissatisfaction, and financial losses to our Company. System failures can occur due to hardware or software malfunctions, power outages, or other technical issues. These failures can lead to service interruptions, delays, or even complete shutdowns of our Company's operations. The impact of system failures can be severe, leading to loss of revenue, damage to the Company's reputation, and even legal liabilities.

Cyberattacks are also a growing threat to the business of our Company, as we handle sensitive client data and financial information. These attacks can take various forms such as phishing, malware, ransomware, or denial-of-service attacks. The consequences of cyberattacks can be severe, leading to data breaches, financial losses, and damage to the Company's reputation. Further, internal inefficiencies can arise in our company due to poor management practices, inadequate training, or lack of standard operating procedures. These inefficiencies can lead to errors, delays, or quality issues in our Company's operations. The impact of internal inefficiencies can be significant, leading to client dissatisfaction, loss of revenue, and damage to the Company's reputation.

5. ***Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of liquidated damages.***

Our clients are spread across wide variety of sectors like various Telecom, Foodtech, Autotech, E-Commerce, Fintech, Education, Healthcare, Hospitality, Government, Banking etc. Our company has also entered into service agreements with them for providing services. We enter into various contracts with our clients. Certain of these contracts may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our operational costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls.

Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our contractual obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In certain instances, we may also be required to bear consequential liability. In the event there is an increase in liability against us, our business, financial condition and results of operations may be affected.

For further details of our business, please refer section titled ***"Our Business"*** on page 107 of this Draft Prospectus.

6. ***The properties used by the Company for the purpose of its operations are not owned by us. Any termination of the relevant lease agreement or rent agreement in connection with such properties or our failure to renew the same could adversely affect our operations.***

These premises used by our Company have been obtained on a Lease basis from third parties, which includes our Registered office, Corporate Office and Branch Offices. We cannot assure you that we will be able to renew our lease agreements or enter into new agreements in the future, on terms favourable to us, or at all. In the event that any lease agreements are not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If any lease agreements are terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition, and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. Any termination of the lease in connection with these properties or our failure to renew the same, in a timely manner or at all could adversely affect our operations.

For details regarding properties taken on lease refer the Section titled -Properties - “***Our Business***” beginning on page no 107 of this Draft Prospectus.

7. ***Certain Computer Systems used by our Company for the purpose of its operation are not owned by us. Any termination of the relevant lease/rent agreement in connection with such properties or our failure to renew the same could adversely affect our operations.***

We also do not own certain computer systems which we use for the purpose of our business operations at our Branch Offices. These computer systems are taken on lease/rent by us from third parties for a certain period. As per the lease/rent agreements, non-payment or default in payment of rentals or violation of any term of lease/rent agreement may require us to return the said computer systems which may cause disruption in our operations and thus adversely affect our profitability. We also cannot assure that lessor will not terminate the lease/rental agreement prior to expiry or at the time of expiry of the agreement, which would require us to arrange another vendor and may have an adverse effect on conducting our business operations.

8. ***If we are unable to successfully implement our proposed expansion plans; our results of operations and financial condition could be adversely affected.***

Our Company is planning to scale-up and expand its business operations and client portfolio. Our company is proposing to set up 2 (two) Call Centres with seating capacity of 150 each at Palakkad in the state of Kerala and Raichur in the state of Karnataka. The total estimated cost to operate these two locations is ₹ 285.82 Lakhs (including 300 Nos. Computer Systems of ₹ 150.63 lakhs). From the Net Proceeds of the Issue, we will be deploying funds for Computer Systems, Servers, Work Station, Furniture, Networking System, UPS, Air Conditioner, CCTV, Biometric, Server Room Peripherals and Carpet Tiles. These expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by the Company. In addition, our expansion plans have not been appraised by any independent or third-party agency, and accordingly, in the absence of such independent appraisal, our expansion plans may be subject to change based on various factors which are beyond our control.

9. ***Our Company is yet to place orders for purchase of Computer Systems, Servers, Work Station, Furniture, Networking System, UPS, Air Conditioner, CCTV, Biometric, Server Room Peripherals and Carpet Tiles. Any delay in placing orders or procurement of such items may delay the schedule of implementation and possibly increase the cost of commencing operations.***

Our Company has received third party quotations of ₹ 565.06 lakhs for Computer Systems, Servers, Work Station, Furniture, Networking System, UPS, Air Conditioner, CCTV, Biometric, Server Room Peripherals and Carpet Tiles. The said capital expenditure is proposed to be utilized from the Net Proceeds. However, we have not placed orders for the said capital expenditure to be utilized from the Net Proceeds. The cost of the proposed capital expenditure is based on the quotations received from third party vendors. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 72 of this Draft Prospectus.

We cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the same or in the event the vendors are not able to provide the same in a timely manner, or at all, we may encounter time and cost overruns in setting up these new locations. Further, if we are unable to procure the same from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors which satisfy our requirements at acceptable prices. Our inability to procure the equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, delay in the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

10. ***We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.***

The BPO industry is highly labour intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. The industry, including our Company, experiences high employee cost. For the Year Ended March 31, 2023, our employee benefit expenses was ₹ 2,963.22 lakhs consisting 57.82% of our total turnover of our company. There is significant competition for professionals in India with skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the BPO industry or otherwise, could have an adverse effect on us. High attrition rates among our tenured employees, in particular, could result in a loss of domain and process knowledge, which could result in poor service quality and lead to breaches by us of our contractual obligations. Some of our contracts may be terminated by the client if certain of our key personnel working on the client project leave our employment and we are unable to find suitable replacements. A significant increase in the turnover rate among our employees in India, particularly among the highly skilled workforce needed to provide BPO services, would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our services. High turnover rates increase our expenditures and therefore impact our profit margins due to higher recruitment, training and retention costs as a result of maintaining larger hiring, training and human resources departments and higher operating costs due to having to reallocate certain business processes among our operating facilities where we have access to the skilled workforce needed for the business.

Our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain personnel with skills that keep pace with the demand for outsourcing, evolving industry standards and changing client preferences. A lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfil the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

11. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes, our and growth could be adversely affected.*

Our business is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological advancement. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis and to provide a wide range of services.

Transitioning to new technologies may be disruptive to our resources and the services we provide. The process of developing our platform is also extremely complex and is expected to become increasingly complex and expensive in the future due to the introduction of new platforms, automations, operating systems and technologies. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services, or retain and attract skilled staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth. In addition, there may be circumstances when our clients are dissatisfied with our services due to which our business, financial condition, reputation or results of operations could be materially adversely affected.

12. *Wage increases in India may prevent us from sustaining our competitive advantage and may reduce our profit margin.*

Our most significant costs are the salaries and related benefits of our operations staff and other employees. Wage costs in India have historically been significantly lower than wage costs in the developed countries for comparably skilled professionals, which has been one of our competitive advantages. However, because of rapid economic growth in India, increased demand for BPO in India and increased competition for skilled employees in India, wages for comparably skilled employees in India are increasing at a faster rate, which is reducing this competitive advantage. We may need to increase the levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining the quality and number of employees that our business requires. Wage increases in the long-term may reduce our profit margins.

13. *We face intense competition in our businesses, which may limit our growth and prospects. The markets for our services continue to evolve and are competitive.*

We compete with a number of entities that provide similar services in each of the business lines in which we operate. Our competitors may be able to respond more quickly to new or changing opportunities, technologies, and client requirements and may offer better technological services, more attractive terms to clients and adopt more aggressive pricing policies than we will be able to offer or adopt. In addition, we expect that the markets in which we compete will continue to attract new competitors and new technologies, including international providers of services similar to ours. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation, price and convenience. Our competitors may have advantages over us.

We cannot assure you that we will be able to compete effectively with current or future competitors or that we will be successful in attracting new customers for our business. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

14. *If our customers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected.*

Our customers may default on their obligations to us due to a variety of factors, including as a result of their bankruptcy, lack of liquidity, government or other regulatory intervention, other reasons such as their inability to adapt to changes in the macro business environment or any other factors which impact their incomes. Additionally, some customers may intentionally default on their repayment obligations.

Further if any such case arises in future, it will impact the financial condition of our company and we need to involve in legal matters for realization of pending dues. Also such adverse impact may limit our ability to recover the dues from such customers and the predictability of our cash flows. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients and increasing credit losses due to financial difficulties of customers could adversely affect our business, financial condition, results of operations and cash flows.

- 15. *Unauthorized disclosure of sensitive or confidential client and client's customer data, whether through a breach of our computer systems or otherwise, could expose us to protracted and/or costly litigation and cause us to lose clients.***

We are typically required to collect and store sensitive data in connection with our services. We take precautions to protect confidential client and client's customer data. However, if any person, including any of our employees, penetrates our network security or otherwise misappropriates sensitive data, we could be subject to significant liability claims from our clients or their own customers for breaching contractual and confidentiality provisions or privacy laws. Further, penetration of the network security of our data centers could have a negative impact on our reputation, which could harm our business.

- 16. *Our revenues are significantly dependent upon services such as Outbound Sales & Services.***

Our core business is Business Process Outsourcing such as Outbound Sales & Services etc. Consequently, our income is significantly dependent on services that we provide and over the years, such services have emerged as the largest single contributor to our revenue and business. Our continued reliance on Services that we offer for a significant portion of our revenue exposes us to risks, including the potential reduction in the demand for such services in the future; increased competition; cost-effective technology; fluctuations in the price and availability of the man power; changes in regulations; and the cyclical nature of our customers' businesses. One or more such reasons may affect our revenues and income from services rendered and thereby adversely affects our business, profitability, cash flows and results of operations.

- 17. *The nature of the contracts we have with our clients contain inherent risks and contain certain provisions, which, if exercised, could result in lower future income and negatively affect our profitability.***

We do not have long-term contracts for all of our clients. Certain other clients, specifically those for whom we have short-term contracts that can be terminated immediately without cause, upon the client giving notice.

In a number of our contracts, we commit to fixed-rate pricing with our clients and therefore bear the risk that our expenses with respect to a particular client engagement could be higher than we estimated at the time of entering into the contract. If we fail to estimate accurately the resources and time required for a contract, future wage inflation rates or currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our income and profitability may be negatively affected.

Moreover, we are unable to predict what types of contractual arrangements we will enter into in the future, and certain of these may contain additional terms that are unfavorable to us or pose risks to our business. Any of these contractual provisions could reduce our income, hinder our ability to compete in the market and operate profitably and could result in the payment of significant penalties by us to our clients, any of which in turn could have an adverse effect on our business, results of operations, financial condition and cash flows.

- 18. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an effect on our business, results of operations and financial condition.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to develop relationships with customers. For further details, see the section titled "**Our Business**" page no 107 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our service;
- Changes in the Indian regulatory environment in field of service industry.

There can be no assurance that we will be able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. We cannot assure you that we will not face any time or cost overruns in respect of implementation of our strategies in the future. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have effect on our business, financial condition and profitability.

19. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our services are manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower.

High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

For further details of our employees, please refer chapter titled **“Our Business”** beginning on page no 107 of this Draft Prospectus.

20. *Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could affect our business prospects, results of operations and financial condition.*

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our business. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. The risks associated with the deployment of manpower engaged by us include, among others, possible claims relating to:

- Actions or inactions, including matters for which we may have to indemnify our clients;
- Our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- Failure of manpower engaged by us to adequately perform their duties or absenteeism;
- Errors or malicious acts or violation of security, privacy, health and safety regulations; and

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and effect our business. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially affect our business, financial condition, results of operations and prospects.

21. *Our debt financing agreements contain certain restrictive covenants that may adversely affect our Company’s business, credit ratings, prospects, results of operations and financial condition.*

Certain debt financing agreements that our Company has entered into contain restrictive covenants that limit our ability to undertake certain types of transactions. Under our debt financing agreements our Company is required to maintain certain financial covenants.

There can be no assurance that our Company has complied with all such restrictive covenants in a timely manner or at all or that we will be able to observe compliance with all such restrictive covenants in the future. A failure to observe the restrictive covenants under our debt financing agreements may result in termination of our financing agreements, levy of default interest, acceleration of all amounts due under such facilities and the enforcement of any security provided in relation thereto. Any acceleration of amounts due under such debt financing agreements may trigger cross-default or cross-acceleration provisions under other debt financing agreements, which may compel us to dedicate a substantial portion of our cash flow from operations or sell certain assets to make such payments thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, in the event of any of the circumstances coming into effect our business, prospects, results of operations and financial condition may be adversely affected.

For further details of our loans, please refer chapter titled **“Financial Indebtedness”** beginning on page no 197 of this Draft Prospectus.

22. *We are subject to the risk of failure of, or a material weakness in our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

23. *Our Company's insurance policies may not protect us against certain operational risks or claims by our employees.*

Our company has taken Insurance Policy for our call centres. While it is believed that the insurance coverage maintained by the company would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by the company will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. If we were to suffer loss or damage resulting from not obtaining or maintaining insurance or exceeding our insurance coverage, the loss would have to be borne by us and it could have a material adverse effect on our results of operations and financial condition.

24. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters
- Other significant regulatory or economic developments in or affecting India.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

25. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company's operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company's control. The results of operations during any financial year or from period to period may differ from one another or from the expected results of operation. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the services offered by the us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled "**Financial Statements as Restated**" beginning on page 165 of this Draft Prospectus.

26. There are certain legal proceedings involving our Company.

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities.

27. Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India & other situation due to pandemic Covid-19.

Our overall performance depends in part on the economic conditions of India. Certain economies have experienced periods of downturn during the pandemic disease of Covid-19 which impacted financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, increases in unemployment, volatility in commodity prices and worldwide stock markets, and excessive government debt. The pandemic disease has adversely affected our business.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy have a material adverse effect on our business, operating results and financial condition.

There may be situations where we may under budget for our working capital requirements, in which case there may be delays in arranging the additional working capital requirements, which may delay the execution of projects leading to loss of reputation, levy of liquidated damages, and an adverse effect on the cash flows. If we experience insufficient cash flows or are unable to borrow funds on a timely basis or at all to meet the working capital requirements, there may be an adverse effect on our results of operations. We may also be subject to fluctuations of interest rates for our financing. If we are unable to secure financing at favorable rates for this purpose, our ability to secure larger-scale projects will be impeded and our growth and expansion plans will be materially and adversely affected which in turn will materially and adversely affect our future financial performance.

Our indebtedness is secured by charges over Immovable property of Promoter and Book debts of Company etc. If we are unable to repay or refinance our outstanding indebtedness, or if we are unable to obtain additional financing on terms acceptable to us, we may be unable to implement our growth strategy, and our business, prospects, financial condition, and results of operations may be adversely affected.

29. *Our management will have broad discretion in how we apply the Net Proceeds of the Issue and there is no assurance that the Objects of the Offer will be achieved within the time frame expected, or at all, or that the deployment of Net Proceeds in the manner intended by us will result in an increase in the value of your investment.*

We intend to use the Net Proceeds for the purposes described under the “*Objects of the Issue*” on page 72 of the Draft Prospectus. The Objects of the Issue comprise (a) Expansion of our Services by launching 2 (two) Call Centres (b) Capital Expenditure towards purchase of Computer Systems, (c) funding incremental working capital requirements of our Company, (d) for issue related expenses, and (e) for general corporate purposes (the amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds). Further, our Objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue would require a special resolution of the shareholders, and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, in accordance with applicable law.

In case of an increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If the estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. Additionally, government contracts contain terms that expose the company to heightened levels of risk and potential liability than non-government contracts. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business. In particular, we are required to obtain certificate of registrations for carrying on certain of our business activities from the Government of India, the State Governments and other such regulatory authorities that are subject to numerous conditions. If we fail to maintain such registrations and licenses or comply with applicable conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition and results of operations.

We and our customers, may require various regulatory approvals, sanctions, licenses, registrations and permissions in connection with our operations and various activities involved in such work orders. We or our clients may face significant uncertainties due to various factors in obtaining or maintaining such approvals. If such approvals are not obtained in a timely manner or at all, there may be a material adverse effect on various activities, including our operations, thereby adversely affecting our results of operations and financial condition. Furthermore, our government approvals and licenses are subject to numerous conditions, some of which are onerous and require us to incur substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business, prospects, financial condition and results of operations may be adversely affected. While we typically apply for the renewal of any existing regulatory approvals prior to their expiry dates, there can be no assurance that we will receive such renewal in time or at all.

43. *Our success depends heavily upon our Promoters and Directors for their continuing services, strategic guidance and financial support.*

Our success depends heavily upon the continuing services of Promoters who are the natural person in control of our Company. Our Promoters have a vast experience in Business Process Outsourcing (BPO) Industry. They have established cordial relations with various clients over the past several years, which have immensely benefitted our Company's current customer relations. We believe that our relation with our Promoters, who have rich experience in the industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters are also part of certain other ventures and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

44. *An inability to manage our growth could disrupt our business and reduce our profitability.*

We have experienced continuous growth in the preceding years. We expect our business to grow as a result of our plans to expand further. We expect any growth in our business to place additional demands on us and require us to continuously evolve and improve our operational, financial, and internal controls across the organization. In particular, continued expansion increases the challenges involved in:

- (i) maintaining high levels of client satisfaction;
- (ii) recruiting, training, and retaining sufficient skilled management, technical and marketing personnel;
- (iii) adhering to health, safety and environment and quality and process execution standards that meet client expectations;
- (iv) preserving a uniform culture, values, and work environment in operations; and
- (v) developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems.

Our ability to implement our business plans depend on, inter alia, global economic conditions, our capital resources, our ability to obtain any necessary government or regulatory approval or licenses, and the availability of management, financial and other resources.

The success of our business will depend greatly on our ability to implement our business and strategies effectively. Even if we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of targeted clients. We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our financial, operating, and other internal controls. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition, and profitability.

47. *Our directors have provided personal guarantees for loans availed by our Company. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal guarantees.*

In case of a default under our loan agreements, any of the personal guarantees provided by our directors may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. Also if our Directors revoke their personal guarantees and we may not be successful in procuring alternate guarantees to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key team members in each of our business units for the management of our daily operations and the planning and execution of our business strategy. These personnel possess technical and business capabilities that are difficult to replace. There is intense competition for experienced senior management and personnel with technical and industry expertise in the BPO industry and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. In addition, some of our client contracts can be terminated if certain key individuals working on those projects leave and we are unable to find a suitable replacement in a timely manner. Although we have entered into a tailored management contract with our chief executive officer, other members of our management team are employed under standard employment contracts, which may not adequately incentivize them to remain with our Company or protect our Company in the event of their departure or otherwise. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

- 56. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future.***

Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by the applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

- 58. *An inability to renew quality accreditations in a timely manner or at all, or any deficiencies in the quality of our products may adversely affect our business prospects and financial performance.***

- 59. *We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.***

Interest rates for borrowings have been volatile in India in recent periods. Our operations are funded to a significant extent by working capital debt facilities and increases in interest rate (and consequent increase in the cost of servicing such debt) may have an adverse effect on our results of operations and financial condition. Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions from time to time, there can be no assurance that these agreements will protect us adequately against interest rate risks.

Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this draft prospectus.

B. Issue Related Risks

- 63. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 72 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

- 64. *There is no guarantee that our Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the Emerge Platform of National Stock Exchange of India Limited within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

65. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as a unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, our management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

66. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

67. *After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.*

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

- 68. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

We have applied to National Stock Exchange of India Limited to use its name as the Stock Exchange in this offer document for listing our shares on the Emerge Platform of National Stock Exchange of India Limited. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 69. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 70. *Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 71. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "**Dividend Policy**" on page 164 of this draft prospectus.

- 72. *The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.***

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

73. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

74. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

75. *Foreign investors may be restricted in their ability to purchase or sell Equity Shares.*

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

76. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

77. *Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.*

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

EXTERNAL RISK FACTORS

78. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

79. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

80. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to “**Key Industry Regulations and Policies**” on page 123 of this Draft Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Our Company will comply with relevant regulations as and when applicable. However, any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

81. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

82. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

83. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

84. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

85. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any significant change in India’s economic policies could disrupt business and economic conditions in India generally and the Company’s business in particular.

86. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India’s nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The Government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India’s current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India’s trade partners witness an economic slowdown. According to Mr. Piyush Goyal, minister of commerce and industry, consumer affairs, food and public distribution and textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.

- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Voice Support Services

We deliver high-standard voice support services; encompassing real-time, two-way voice services and other calling & call management telephonic services that increase customer loyalty and retention, at compelling costs. We provide a cost-effective way to support businesses through our voice-based (inbound and outbound calls) support service that answers queries and resolves technical issues for customers. We efficiently handle these inbound and outbound calls using an advanced auto-dialer technology.

Our expertise extends across various domains, driving enhancements throughout the organisation. Our team of voice-based support professionals boast with adequate industry experience, bringing a profound understanding of crucial business processes to the table.

Diving a little deeper into our two voice-based support services:

Inbound Voice Process: This process is responsible for managing all incoming customer calls, which may pertain to a range of issues. When a customer places a call, our customer care representative endeavours to address the issue. Resolution can occur during the call itself, or if required, the representative initiates the appropriate procedure to register a formal complaint.

Outbound Voice Process: Conducting an outbound voice process is more challenging compared to the inbound voice process. In this scenario, customer care executives are tasked with initiating calls to customers. These executives effectively capture the customers' attention during their calls and skilfully commence pitching the product. We strategically articulate the product's benefits in a compelling manner that resonates with the customers.

- **Customer Service Follow-up Calls:** Strengthen relationships by proactively addressing concerns, garnering valuable feedback, and showcasing dedication to customer satisfaction.
- **Up-selling & Cross-selling:** Maximise revenue by suggesting complementary offerings, and showcasing the full value of a brand's offerings to its customers.
- **Welcome Calls to New Customers:** Establish a strong rapport from the outset, by extending warm, informative welcomes to new customers, thereby setting the stage for a positive relationship.

Backend Support:

Our commitment to exceptional service extends beyond customer-facing interactions to encompass the vital backend processes that ensure a seamless and efficient experience for our clients. APPLICABLE LAWS AND REGULATIONS

BUSINESS/TRADE RELATED LAWS/REGULATIONS

Information Technology Act, 2000 (“Information Technology Act”)

The Information Technology Act was enacted with the purpose of providing legal recognition to electronic transactions. In addition to providing for the recognition of electronic records and creating a mechanism for the authentication of electronic documentation through digital signatures, it also provides for civil and criminal liability including fines and imprisonment for various computer related offenses relating to unauthorized access to computer systems, modifying the contents of such computer systems without authorization, damaging computer systems, the unauthorized disclosure of confidential information and computer fraud. The Information Technology (Amendment) Act, 2008, which came into force on October 27, 2009, amended the IT Act and *inter-alia* gives recognition to contracts concluded through electronic means, creates liability for failure to protect sensitive personal data and gives protection to intermediaries in respect of third-party information liability.

The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules 2011

The Department of Information Technology under the Ministry of Communications & Information Technology, Government of India has notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 in respect of Section 43A of the Information Technology Act, 2000. The said rules deals with the protection of sensitive personal data or information and the security practices and procedures to be followed. Further these provide reasonable security practices and procedures to be put in place by a body corporate and person as defined under the said Rules.

National Digital Communication Policy, 2018 (“NDCP”)

NDCP seeks to unlock the transformative power of digital communications networks – to achieve the goal of digital empowerment and improved well-being of the people of India; and towards this end, attempts to outline a set of goals, initiatives, strategies and intended policy outcomes.

Digital India is already unfolding. India’s digital profile and footprint is one of the fastest growing in the world. With over a billion mobile phones and digital identities and half a billion internet users, India’s mobile data consumption is already the highest in the world. Over 200 million Indians regularly use social media and in the last year alone, over 200 million Indians took to mobile banking and digital payments. At the current pace of organizing, it is estimated that India’s digital economy has the potential to reach one trillion USD by 2025. The rapid and unprecedented proliferation of the mobile phone, the internet, social media platforms, and the rapid expansion of digital payments, data consumption and generation across India indicate that the data economy and digital technologies and services are no longer the prerogative of the privileged few; but that they have indeed evolved into widespread instruments of access and empowerment for more than a billion Indians.

The Personal Data Protection Bill, 2019 (“Bill”)

The Personal Data Protection Bill, 2019 was introduced in Lok Sabha on December 11, 2019. The Bill seeks to provide for protection of personal data of individuals, and establishes a Data Protection Authority for the same. Data Protection refers to the set of privacy laws, policies and procedures that aim to minimize intrusion into one's privacy caused by the collection, storage and dissemination of personal data. Personal data generally refers to the information or data which relate to a person who can be identified from that information or data whether collected by any Government or any private organization or an agency.

Data Center Policy, 2020

Indian Data Centre market has seen tremendous growth in the past decade, riding on the explosion of data through smart phones, social networking sites, e-commerce, digital entertainment, digital education, digital payments and many other digital businesses/ services. This growth in data is further stimulated by adoption of emerging technologies such as quantum computing, artificial intelligence, internet of things etc. While the Data Centre sector is witnessing growth in the country, there are known impediments to its growth such as lack of infrastructure or Industry status of the Data Centres, complex clearance processes, time consuming approvals, high cost of power, lack of published standards, absence of specialized building norms for building the Data Centres, submarine cable network connectivity limited to few states and high cost of capital and operational expenditure etc. This policy aims to offset these challenges in order to accelerate the current pace of growth and propel India in becoming a global Data Centre hub. Several states have also formulated their own data center policy in line with the central policy.

The Telecom Commercial Communications Customer Preference Regulations, 2018:

On July 19, 2018, the Telecom Regulatory Authority of India (‘TRAI’) notified the Telecom Commercial Communication Customer Preference Regulation, 2018 (‘Customer Preference Regulations’) to curb the problem of unsolicited commercial communication (popularly known as ‘spam’). The Customer Preference Regulations, inter alia, provide for: (i) registration of senders (businesses and telemarketers) with telecom service providers to reducing the ability of unknown entities reaching customers with calls and messages that are fraudulent or otherwise of dubious nature; (ii) registration of headers, i.e. alphanumeric string of characters or numbers assigned to a sender of commercial communications for segregating different types of messages related to one time passwords, balance enquires, flight alerts, special offers, etc.; and (iii) complete control to the subscriber to consent to receiving commercial communication and the ability to revoke the consent already granted. Additionally, the concept of registered templates for both message service and voice communication has been introduced to prevent deliberate mixing of promotional messages into the transactional stream. The salient features of these regulations also include the adoption of ‘distributed ledger technology’ (or blockchain) by telecom service providers to ensure regulatory compliance is carried out for sending commercial communication. Every telecom service provider is required to develop an ecosystem, with the prescribed functions, to regulate the delivery of the commercial communications to customers.

Guidelines for Other Service Providers, 2020:

In view of proliferation of Telecom services and advancement of technology and the receipt of representations from Industry during 2015, a reference was sent to TRAI for soliciting recommendations on the Terms & Conditions for registration of OSPs. After the receipt of TRAI Recommendations on 21.10.2019 on ‘Review of Terms and Conditions for registration of Other Service Providers (OSPs)’ and the deliberations with various stake holders, the Government drastically simplified the OSP guidelines with an aim to qualitatively improve the 'Ease of Doing Business' for the IT Industry particularly BPO and IT Enabled Services by first issuing the 'New Guidelines for OSPs' on 05.11.2020. These guidelines did away with the registration requirements and removed the requirements of periodic compliances with other liberalisation.

These Guidelines were further amended and the 'Revised Guidelines for OSPs' dated 23.06.2021 were issued which are more liberal and in line with the motto of “Ease of Doing Business” and aims to give further impetus to the growth of IT & ITeS industry in the country. In addition to the relaxations given vide guidelines dated 05.11.2020, the revised guidelines provided further relaxations.

Guidelines on Managing Risks and Code of Conduct in Outsourcing of Financial Services by banks:

The due diligence process should generally conform to the guidelines issued by RBI on outsourcing of financial services vide circular DBOD.No.BP.40/21.04.158/2006-07 dated November 3, 2006. Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.

RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
